SUMMARY

To work in competitive and progressive environment to enhance my professional career and skills in order to take a part in the development and success of the organization and develop my skills, abilities and vision to become a highly competent professional and intellectual.

EDUCATION

Bachelor in Computer Engineering

College of Information Technology and Engineering / Kathmandu, Nepal /
November, 2019 - Present

As a current Bachelor's degree candidate in Computer Engineering, I am developing a strong foundation in computer science principles and their application to real-world engineering problems.

+2

Mithila Institute of Technology / Janakpur, Nepal / August, 2017 - August, 2019
I have completed my +2 degree in Science, which has equipped me with a solid foundation in science principles and analytical thinking.

SEE

New Modern English Boarding Higher Secondary School / Jaleshwar, Nepal / April, 2017

I have completed my SEE (Secondary Education Examination) with a GPA of 3.4, which reflects my strong academic performance and dedication to my studies.

PROJECTS

Covid-19 Web App

I developed a COVID-19 tracking web application for India using React JS and Bootstrap. The app fetches real-time data on COVID-19 cases across states using the fetch() API method, providing users with an intuitive and user-friendly interface to visualize the situation and stay informed.

NewsSite Web App

NewsSite Web App, built with React JS and Bootstrap, fetches real-time news data from reliable sources worldwide using Axios. Users can quickly access categorized news content in areas such as science, entertainment, business, technology, and sports for easy consumption and staying up-to-date.

Weather Web App

I developed a Weather web application using React JS that provides real-time weather information. The app fetches weather data from reliable sources using Axios and displays it in an easy-to-use format. Users can view the current temperature and get a 7-day forecast for their chosen location.
